
Falcon – The National Bird of UAE

The Falcon is the National bird of The United Arab Emirates (UAE). It symbolises force and courage, and acknowledges the falconry in the Arab tradition and culture. The falcon is quite a rare sight by birdwatchers and is considered a very uncommon and shy bird when compared to the rest. They are fast flying hunters suited for taking prey in the air. They are very alert and agile and have a very sharp eyesight. A number of species, however, are insectivorous or eaters of carrion. Although falcons strike or grasp their prey with their sharp claws, they generally kill the captured prey with their beaks. The short-winged falcons kill with their claws. It is the pride of UAE and is looked upto with majesty and honour.

You will need: Fevistik & Colour Magazine sheets

- Tear the magazine sheets appropriately to form the falcon and background to form the sky.
- Place and stick them using Fevistik.
- Leave them to dry.
